EDUCATION

Ira A. Fulton Schools of Engineering | Arizona State University, Tempe, AZ

May 2028

Bachelor of Science in Engineering | Mechanical Engineering

Awards:

- George Snow Scholarship Recipient | \$12,656 Dean's List 1X
- New American University Scholarship | FULL HMDP ASU Grad

ENGINEERING PROJECTS

Custom Screw-Driven Clamping Mechanism | SOLIDWORKS

- Designed and modeled a screw-driven clamping mechanism that converts rotational input into controlled linear motion, applying assembly constraints, tolerance considerations, and design-for-manufacturing principles.

Shock Assembly Design | SOLIDWORKS

- Designed and assembled a mechanical shock absorber system with emphasis on component integration, assembly constraints, engineering drawings, and technical documentation.

Solar Power Meter | Arduino, C++, LM358, Tinkercad

- Designed, prototyped, and tested a solar power meter using an LM358 op-amp and Arduino Uno for signal conditioning, data processing, and real-time voltage and power display.

3D Printing & Rapid Prototyping | SOLIDWORKS, Bambu Studio

- Designed, sliced, and 3D printed functional parts, including a headphone stand and corner shelves, iterating CAD models and print parameters based on physical testing to improve fit, functionality, and printability.

PROFESSIONAL EXPERIENCE

Events Committee Member | ALPFA, ASU Chapter, Tempe, AZ

September 2025 – December 2025

- Used Microsoft Excel to organize event plans, schedules, and logistics for 2 weekly professional development and social events supporting an organization of 300+ members.
- Contribute to weekly committee meetings to discuss, design, and create programming that promotes networking, leadership development, and cultural connections.
- Collaborated with 10+ committee members to coordinate event logistics and promotional activities while meeting recurring weekly deadlines.

Cashier/Customer Service | Walmart, Phoenix, AZ

May 2024 – August 2024

- Processed 100+ transactions per shift while maintaining 100% cash-drawer accuracy and assisting 30–50 customers daily with questions and issue resolution.
- Trained and mentored 3 new cashiers on point-of-sale systems, customer service procedures, and store policies to accelerate employee onboarding.

LEADERSHIP & ENGINEERING EXPERIENCE:

Circuits Lab Project Team Lead | Arizona State University, Tempe, AZ

January 2026 – May 2026

- Performed Arduino programming, circuit integration, troubleshooting, and prototype testing to support development of the final system.
- Led a team through the design, prototyping, and testing of a solar power meter, coordinating project responsibilities and development from circuit design through physical implementation.

Engineering Team Lead | Arizona State University, Tempe, AZ

August 2024 – November 2024

- Led a team of 4 students through engineering design challenges, coordinating project planning, task delegation, prototyping, and final technical presentations.
- Guided circuit design and C++ development while assigning responsibilities based on team members' technical strengths.

SKILLS

Engineering & Design: SOLIDWORKS, Bambu Studio, CAD Modeling, Mechanical Design, Engineering Drawings, Technical Documentation, 3D Printing, Rapid Prototyping, FEA & GD&T (Spring 2027 Coursework)

Programming & Electronics: MATLAB, C++, Arduino, Circuit Design, Electrical Wiring, Breadboarding, Op-Amp Circuits, Lab Instrumentation, Data Analysis

Professional: Project Leadership, Technical Communication, Microsoft Excel, Bilingual (English & Spanish)
